

Integral NLP Practitioner Course for Health Care Professionals

Frequently Asked Questions (FAQs)

1) Could you explain what is the NLP training all about in simple terms ?

NLP is the Study of the Human Subjective Experience structure and the Science and Art of Personal and Professional Excellence.

It is the NLP Core Operating Principle that Excellence in Human Condition can be studied , modeled , transferred and replicated with good results.

Personally , I think the NLP training supplement and compliment our clinical Training and development.

In fact ,the Society of medical NLP in U.K. has been promoting NLP training for the Health Care professionals for the past few years with success.

2) Could you tell us more about the Course Structure and Design , after Reading , I feel a bit “overwhelmed” and “Confused” in the program details?

In NLP , Confusion is the gateway to New Learning. The Course structure and Design is tailored- made for health care professionals by a Doctor-NLP Professional Trainer/Coach with International Accreditations

It is built on Modular basis (3 modules or levels) for flexibility in attending. Each module /level has a distinctive theme and is both independent and integrated with each other with enough flexibility to suit individual participant needs.

In the level one , the focus is on Mind-body connections-communicating/empowering- NEURO part

In the Level two, the focus is on language- Verbal , Intra-verbal and Non -verbal -the LINGUISTIC part

In the level three , the focus is on strategy/ Time line- the PROGRAMMING or Patterning part

Each level will need 3 days (plus day of Graduation Presentation in level 3) – 10 days Training in Toto held on Saturday so that HA or non HA health care staff on shift duty or 5 days work-week can attend. The first 2 days will be on didactic and experiential workshops. The other whole day is on Practical Session to allow more practice in small groups on Critical NLP skills and Personal Teaching/Coaching.

3) What is the pathway for International Certification and could I only attend one module only ?

There is built in Ample flexibility and Choice .

Generally speaking ,there are **5 Pathways** to suit your needs.

- A) level one only
- B) level two only
- C) level one and two only (either level one then level two
or level two and then level one)
- D) the whole practitioner course (level one –two- three)—In order to attend level three, workshop participants need to attend either previous level one or two or both level one or two (level 1-2-3 or 2-1-3 or 1-3-2 or 2-3-1)
- E) On completing of each level , there will be an attendance certificate
- F) On completing all three levels in any combination and satisfy the attendance (80%) and assignment (6 simple assignment for contents revision and Book reading) criteria and had presented on day of Graduation Day- the participant will be awarded 2 NLP Practitioner certificates -----One local by the HA A&E Training center and HKSEMS validated By the American Board of NLP (ABNLP) and the other – International with the ISNS (plus the attendance certificate of each level –total five)

I suggest that you enroll in level 1 or 2 to see-hear-feel the benefits before going on 2 or 1 and 3. –The test is in the Pudding.

4) How is the course compared with other NLP courses in the Business Market ?

For the current similar NLP practitioner course on the market , it is about \$10,000 to \$ 15,000 as it is run on a profit -making model. And it is NOT tailored made for the health care professionals .

This is much Value and Benefits for the money you spent. In addition the basic process of the Hypnosis will be taught in level two without additional extra cost to the workshop participants.

The net gain of the course , after deducting the expenses , such as Venue booking administrative cost ,Trainer and or Co –Trainer Honarium , Certification and Copy-right Royalty fee to ISSN. will be channeled for professional training and development for HKSEMS.

5) What about if I am interested and the training schedule does not match my schedule, what is your overall plan for the future ?

The whole integral NLP Practitioner course for Health Care Professionals will be run on a regular basis starting 2011 onwards – about 2 courses per year depending on the Response

The first Cycle Training was completed in Jan 2011 and the Second cycle Training will be completed in mid Sept 2011 and the third cycle will start in Oct 2011

6) Could you share some of the comments from the previous participants for my reference and consideration ?

Sure: they are as followed: (Direct Quotes)

“ I find the workshop is really Useful and Practical...”

“ Stimulating and Inspiring..”

“Lots of things are taught within a short time..”

“ Materials are presented in an interesting way supported with vivid real life events and Clinical Examples...”

“ comprehensive Coverage of theories exemplified with scientific evidences...”

7) What is your governing Vision and Mission In the NLP Training ?

We envision “A preferred future in workplace” (in the clinical field)

And we train with a Heart and Care .. and the State -of -Art Expertise in the field of Neuro-Semantic (NS)–NLP (the third Generation)...

The Essence of the NS-NLP- “ Be the Best that you can become...”

According to Abraham Maslow “ ---- Self -Actualizing Person not as an Ordinary person with something added but rather as an Ordinary person with nothing taken away..”

Dated 1/9/2011
